Integers

R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

Integers In R Markdown!

Integer initialization

```r
 #Assigning to a variable
x = as.integer(100)
```

Integer Conversion

```r
g = as.numeric(55L) # will convert the integer variable to a numeric
```

Investigating Data types

```
## [1] "integer"
```

End of Integer reports..

Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
